

CAREERS IN THE @ SHEEP INDUSTRY:

Lifestyle, Technology, Innovation

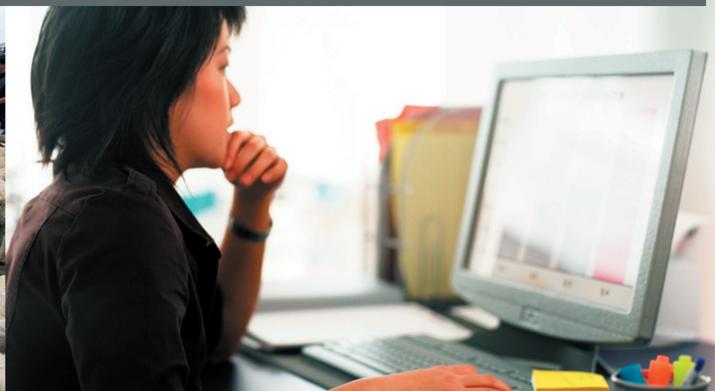

FARMER

Farming is diverse. Part business manager part agriculture expert, it is a rewarding and potentially very profitable profession.

STOCK & STATION AGENT

Farming is big business. Stock and Station Agents advise and represent farmers in business transactions such as the buying and selling of livestock, fertiliser, farming land, equipment and merchandise.

AGRICULTURAL ECONOMIST

Agricultural Economists work in the public and private sector across a wide range of activities, from managing farm businesses to consulting to food or fibre processors. Agriculture is big business and running it well requires good business skills.

VETERINARIAN

Performs diagnosis and treatment of animal injuries and illnesses. Veterinarians advise farmers and pet owners about how to maintain the health and wellbeing of their animals. A job with a chance to make a difference.

MEAT PROCESSING OPERATOR

Works as part of a team. Produces meat for export, wholesale and retail. Skilled operators are highly valued and well paid.

SHEARER

Removes the wool from sheep using refined techniques requiring great skill and stamina. Highly skilled and fit shearers are in demand all over the world, providing great opportunities to travel the world and earn good pay.

AGRICULTURAL SCIENTIST

Agricultural scientists work to improve the profitability and sustainability of rural enterprises. World first discoveries in agriculture are part of Australia's scientific contribution.

FOOD TECHNOLOGIST

Involved in the development of new food products and processes that turn raw materials into food products. Food technology is a huge global industry.

WOOL CLASSER

The classer classifies wool according to its physical characteristics. A classer's job is a critical role in the woolshed, one that requires a keen eye and good judgement. Practical and hands on and rewarding.
