

# Can Hormones or Methionine Improve Wool Production of Pregnant and Growing Sheep?

CRC  
for  
Premium  
Quality  
Wool

Produced for the CRC for Premium Quality Wool undergraduate program by;  
Dr. Peter Wynn, The University of Sydney, and  
Dr. Tony Schlink, CSIRO Animal Production.

# Pregnant and growing sheep

- increased demand for amino acids for fetus and tissue growth
- supplementation is often uneconomical
- hormones may be used for redistribution of nutrients to the follicle
